CAREER OBJECTIVE

- Motivated MCA student with strong adaptability and a passion for continuous learning. Seeking to contribute to an innovative organization by applying technical and problem-solving skills in software development. Committed to building efficient solutions and continuously improving technical expertise in modern technologies.

EDUCATION

- **Master of Computer Applications**: Siddaganga Institute of Technology, Tumkur - CGPA: 8.6 (2024–2025)
- **Bachelor of Computer Applications**: Sree Siddaganga College of Arts, Science and Commerce, Tumkur CGPA: 7.5 (2020–2023)
- **Pre-University** : Sarvodaya PU College, Tumkur —72% (2018–2020)

EXPERIENCE

- **SEO Intern — Think For Education** June 2026 – Present
  - Worked on on-page SEO, keyword research, content creation, and backlink building to improve website visibility and search performance.
  - Created SEO-optimized content for educational course and college landing pages with a focus on relevant keywords and natural readability.
  - Performed competitor research and assisted with identifying relevant keywords and backlink opportunities.

PROJECTS

- **Face Recognition-Based Attendance Monitoring System** Technologies: (Python) Developed a facial recognition system that automates attendance marking through real-time facial recognition with secure data storage. Implemented face embedding comparison using cosine similarity for improved recognition accuracy. Collaborated with a team to troubleshoot and improve the system based on user feedback.
- **Digital Platform for Mobile Repair Services** Technologies: (HTML, CSS, JavaScript, MySQL, Deployment) Developed and managed the digital presence for Mobifixx , a local mobile repair and accessories shop, by designing and deploying its website and handling hosting configuration. Structured service listings, integrated customer inquiry features, and added location mapping to improve customer interaction with the shop.
- **FunFusion** Technologies: (HTML, CSS, JavaScript) funfusion is a responsive and interactive web-based game hub that features a collection of lightweight, browser-friendly mini-games.The platform offers users a seamless way to play multiple games on a single website — with no external libraries or frameworks.
